## Recommendation Letter

I'm writing this letter of recommendation on behalf of Miss. Vinita Chappar who was a student of mine during her undergraduate studies at our college. I have taught Vinita subjects like Operating Systems design, OOPs concepts, Advanced Computer Programming etc. both theory and the practical implementations. In my 3 years of association with Vinita, I believe she has excelled not just academically but on a personal level as well.

Vinita was one of the brilliant students of her batch. Her performance for the Advanced Computer Programming was outstanding. She secured 90% marks in all her practical exams in the final year. She was always a keen learner. She always came to me to ask for assignments other than her regular curricular assignments. Her logic building skills are outstanding which made it easier for her to implement various programs in C++, Java as well as advanced Java.

In 3<sup>rd</sup> year of her undergraduate studies, she did a mini project on "The sixth sense technology" under my guidance. She not only understood the concept of AI but she also wrote a thesis on it. She also expressed her interest to explore more into it and this became the base for her undergrad project "A Pervasive and smart healthcare system". I had evaluated her mini project presentation and had witnessed the exceptional presentation skills she possessed. Due to this, I gave her a responsibility to teach her juniors some programming concepts and she took it with great enthusiasm.

Vinita was not always just academically inclined but she also loved to participate in various extra-curricular activities. She has hosted many events such as annual gatherings, teacher's day, fresher's party etc. Her elocution skills being really good, she was always the life of a party. She had also arranged a "technotsav" for her juniors in her last year of undergrad studies. Her leadership skills were tested in this as she had to manage everything and get all her co-hosts to work together to make the event a success.

Being involved with her for 3 years, Vinita has created a special student-teacher bond with me. She had expressed her thoughts on how committed she is to gain more knowledge of the computer world and thus it gives me immense pleasure to recommend her for Master's programme in your esteemed University. With 2 years of experience behind her, a Master's degree will give her the right edge towards success in her career.

Mrs. Kamal Reddy  
Professor, Computer Department,  
Siddhant College of Engineering,  
SavitribaiPhule Pune University, Pune.
