To Whom It May Concern

A scholar and a technology enthusiast who believes in contributing to the existing body of pedagogy and research in every possible way, Priyansh stands synonymous with introspective learning which is crucial for a student of engineering. At your campus, Priyansh will seek to test his abilities to the demands of specialized technological studies, and it is with this belief I write this letter of recommendation for him.

We are acquainted for the last 5 years and I taught his batch Software Engineering and Cloud Computing during his undergraduate studies in Dehradun Institute of Technology. Priyansh stood up well to mental & physical pressure of work pushing his limits every time. Speaking of his merits, Priyansh was also one of the few who balanced multiple roles with ease without compromising on his capability as a student. Apart from being one of the chief organizers of the university's techno cultural fest, he along with his peers took the responsibility of building the fest's website. His endeavorhelped the batch gain a strong base in PHP, HTML/CSS, JavaScript and Adobe Photoshop. This not only marked him as a socially involved individual but also brought out his leadership skills on the move. His ability to lead as a team player and as a change initiator speaks volumes about his capacity as a student. I believe he would bring similar qualities of character, leadership and intellect to your university. These abilities coupled with his determined nature will enable him to understand, reflect, research and empathize with others while never losing touch with who he essentially is.

A motivated and positive individual, Priyansh displayed absolute brilliance in his demeanor, character and academic prowess. He has proven his mettle when it comes to understanding the Software Project Estimation Techniques such as the Decomposition Technique and the Empirical Technique. Always staying ahead of the game, he will leave a valuable legacy for your institution. He also discussed with me his academic goals that he wanted to work on and needless to say, I was truly impressed with the amount of effort he was willing to invest. This shows his caliber as a promising researcher.

Priyansh always works with quality of work in mind giving special attention to details which is extremely critical for higher studies. It is my faith in his potential that I very strongly request for a favorable outcome of this letter of recommendation. If I can provide you with any more information, please do not hesitate to contact me. I find Priyansh to be a motivated individual who has portrayed excellence in all spheres which makes him a suitable candidate for your esteemed university.
